BASED
Mumbai, India

SKILLS

Product & UX

Interaction design · Information architecture · User flows · Storyboards · HMI / cluster design · iOS & Android · Enterprise SaaS · B2C & e-commerce

Research

User research · Usability testing · Personas · Journey mapping · Workshops · Design sprints · A/B testing · UX metrics

Design systems & UI

Multi-product systems · Governance · Tokens & variables · Component libraries · Material & Apple HIG · Visual design

AI

Claude · Claude Design · ChatGPT · Cursor · Figma Make · Figma AI · Google Stitch · UX Pilot · Figma MCP · Skills & plugins

Azhar Shaikh

Senior UX Designer · Automotive HMI, Healthcare, Fintech & SaaS

I design interfaces people have to read under pressure: motorcycle clusters, emergency-care devices and apps for first-time smartphone users. 8 years in UX, 11 in tech.

8 yrs
in UX, after 3 as an engineer at Infosys

Shipped
TFT cluster menus on the Bajaj Pulsar N160 SS

30%
fewer steps on core admin tasks, Portico HRMS

1,000+
users on the live PockIT app

EXPERIENCE

Senior UX Designer · PeepalDesign

Jun 2021 – Present

Design consultancy, Mumbai (remote). UX lead on client engagements, often two in parallel.

AI tools, company website & new business AI — May 2026 – Present

Built **GapScan**, an AI tool that audits a product and reports its UX gaps, and a tool that extracts a live website's design system; both used on client work. Created Claude and ChatGPT skills and plugins for the team, and designed in-house AI apps for PeepalDesign.

Philips Displays · global website redesign — Nov 2025 – May 2026

Restructured IA and navigation for product discoverability, with a modular pattern library for regional sites.

Bajaj Auto · 5″ TFT instrument cluster SHIPPED — Jan – Oct 2025

Led a team of 4 on the information architecture, menus and navigation for Bajaj's move from LCD to TFT. **Chosen over a competing design team** and shipped first on the Pulsar N160 SS. Designed for minimal cognitive load at speed and tactile handlebar buttons.

PockIT · IT repair & refurbished-device marketplace LIVE — Apr – Dec 2024

Led a customer app (B2C and B2B) and a technician app with a junior designer. Built trust for low-tech users: plain-language booking, upfront pricing, in-app part approvals. **Live with 1,000+ users.**

Philips · Tempus Pro emergency care & monitoring — Dec 2023 – May 2024

Designed the companion app for remote vitals and modernised the device UI to homologation and accessibility standards. **Usability-tested with paramedics.**

Bajaj Auto · Mera Bajaj app & Chetak EV display LIVE — Mar – Jun 2023

Led the owner-app redesign for Pulsar riders, **live on the App Store and Google Play for about two years**, and designed the navigation and menu system now shipping on Chetak EV scooters.

SKILLS, CONTINUED

Accessibility

WCAG · Inclusive design · Hindi localisation · Medical & homologation standards

Leadership

Hiring & mentoring · Design critique · Stakeholders · Proposals & estimates · Agile / Scrum · Dev & QA handoff

Tools & code

Figma (Dev Mode) · FigJam · Axure RP · Adobe XD · Photoshop · HTML · CSS · JavaScript · Python

EDUCATION

MS, Information Technology
University of Mumbai
2019 – 2021

B.Sc., Computer Science
University of Mumbai
2012 – 2015

CERTIFICATIONS

Google UX Design Professional Certificate
Google (Coursera)
2022

UXPM Level 1 & 2
UX Alliance
2021 – 2022 · UX-PM1-5004-IN21-0094, UX-PM2-3372-IN22-0091

ACADEMIC LEADERSHIP

Board of Studies Member
Royal Higher Education Society's College, Thane
Jun 2024 – Present

DOMAINS

Automotive HMI · Healthcare & medical devices · Fintech · B2B SaaS · Marketplaces · Social impact · EdTech

EXPERIENCE AT PEEPALDESIGN, CONTINUED

Jeevika · street-vendor platform LIVE — May – Oct 2022

A **Hindi-first app** and NGO dashboard for first-time smartphone users with low literacy, then a live admin panel with harassment heatmaps and escalations.

Portico · HRMS platform redesign — Oct 2021 – Apr 2022

Led a team of 4 designers to turn a legacy HRMS into a modern SaaS platform, with **30% fewer steps** on core admin tasks.

Fintech client · mutual fund module — Jun – Sep 2021

Led design of a mutual fund module in a stock-trading app, from stakeholder workshops to two reviewed rounds of core flows; paused when the client stopped external work.

Other PeepalDesign engagements — 2022 – 2026

Chetak EV owner app UI revamp, Bajaj Auto (Dec 2025 – Jan 2026) · clinical management module UX, HealthAssyst (Jan – Mar 2024) · performing-arts learning app, YoungArtiste (Nov 2022 – Mar 2023, on hold before launch).

UX Designer · White Digital

Feb 2020 – Mar 2021

Led the design team at a digital marketing agency in Mumbai, designing responsive websites and web apps for clients across industries.

UX Designer · Infosys

Nov 2018 – Dec 2019

Designed a **machine-learning product** that reduced dispatcher workload in IT service management. Led design of a gamification platform for internal idea-sharing and a portal for gathering clients' automation requirements.

System Engineer · Infosys

Oct 2015 – Oct 2018

Configured client networks for connectivity, performance and security.

HOW I DESIGN WITH AI

Set honest expectations. Say what the AI can do and how well.

Explain the why. Show the reason or source behind an output.

Keep people in control. AI drafts; people approve, edit or undo.

Design for being wrong. Always keep a manual path.

Confirm before acting. Agents ask before anything irreversible.

Fair and private by default. Be clear about what data is used.

Drawn from Microsoft's Human-AI Interaction guidelines and Google's People + AI Guidebook.

WHAT I BRING TO A TEAM

Research to handoff. Discovery workshops, IA and prototypes built alongside engineering.

Small-team leadership. Teams of up to 4, with design critiques and mentoring.

Hard constraints. Safety-critical, regulated and low-literacy contexts.

Engineer's background. Three years in network engineering before UX.
