Azhar Shaikh

Senior UX Designer | Healthcare, Automotive, Fintech & SaaS

Mumbai, India | +91 97692 11554 | mazhar.shaikh91@outlook.in | linkedin.com/in/mazharshaikh91 | Portfolio: blackhellcan.github.io/portfolio

PROFESSIONAL SUMMARY

Senior UX Designer with 9+ years of experience designing user-centered products across safety-critical healthcare, automotive HMI, fintech, and complex SaaS. Track record of modernizing legacy systems, building design systems, and leading cross-functional teams through end-to-end UX: user research, information architecture, interaction design, prototyping, and usability testing. Delivers accessible, production-ready designs and works closely with product, engineering, and domain experts to reach measurable business and user outcomes.

SKILLS

Design: UX Design, UI Design, Interaction Design, Product Design, Information Architecture, User Flows, Personas, Journey Mapping, Design Systems, Mobile App Design, HMI / Instrument Cluster Design, Responsive Web Design, Gamification Design

Accessibility & Compliance: Accessibility (WCAG), Inclusive Design for Low-Literacy Users, Medical Device Regulatory and Homologation Standards

Research: User Research, Usability Testing, Field Research, Stakeholder Interviews, Requirements Gathering, Design Thinking

Tools: Figma, FigJam, Axure RP, Balsamiq, Adobe XD, Wireframing, High-Fidelity Prototyping

Collaboration: Team Leadership, Cross-Functional Collaboration, Agile / Scrum, Developer Handoff

Technical: HTML5, CSS3, JavaScript, Python

EXPERIENCE

Senior UX Designer, PeepalDesign — Jun 2021 – Present

Mumbai, India (Remote)

Design consultancy role leading UX for healthcare, automotive, fintech, and SaaS clients.

Philips — Philips Displays Global Website Redesign — Nov 2025 – May 2026

- Led the redesign of the global Philips Displays responsive website.
- Restructured information architecture and navigation to improve product discoverability, targeting a ~25% gain.
- Built a modular visual pattern library to keep design consistent across regional sites.

Bajaj Auto — Chetak EV App UI Revamp — Dec 2025 – Jan 2026

- Led a focused 2–4 week UI revamp of the Chetak EV owner app.

Bajaj Auto — 5” TFT Instrument Cluster — Jan 2025 – Oct 2025

- Led a 4-member team designing the information architecture, menus and navigation for Bajaj’s move from LCD to 5” TFT clusters; chosen over a competing design team’s architecture and shipped first on the Pulsar N160 SS (2026).
- Designed for minimal cognitive load and high-speed visibility, with inputs built for tactile handlebar buttons that meet OEM vibration tolerance standards.
- Ran on-site workshops at Bajaj's engineering facility and built frame-by-frame Figma prototypes in parallel with Bajaj’s developers to streamline handoff.

PockIT — IT Repair & Refurbished Device Marketplace — Apr 2024 – Dec 2024

- Led a two-person team designing a two-sided mobile platform: a customer app for booking IT repairs and buying refurbished devices (B2C and B2B), and a technician app for managing daily jobs; now live with 1,000+ users.
- Designed trust into every step for low-tech users: device-first booking in plain language, upfront pricing, in-app approval for new parts, and a happy code the customer shares to close each job.
- Scoped a lean first release with the client to compete against better-funded players, so operations could be set up before scaling the product.

Philips — Emergency Care & Monitoring (Tempus Pro) — Dec 2023 – May 2024

- Designed the next-generation Tempus Pro companion app for remote vitals monitoring in emergency settings.
- Modernized the device UI to meet homologation and accessibility standards, achieving 100% regulatory compliance.
- Built a scalable UI system across clinical devices that improved consistency and cut development effort by an estimated 15%.
- Ran usability testing with paramedics to validate safety-critical interaction flows.

HealthAssyst — Clinical Management Module — Jan 2024 – Mar 2024

- Optimized UX for an analytics-driven clinical management module, reducing task friction and data entry errors by 20%.

Bajaj Auto — Mera Bajaj App & Chetak EV Display Mar 2023 – Jun 2023

- Led a two-person team redesigning the Mera Bajaj owner app for Pulsar riders (pairing, trips, navigation, service booking); live on the App Store and Google Play for about two years.
- Designed the navigation and menu system for the Chetak EV's 5" display, now shipping on Chetak EV scooters.

YoungArtiste — Performing Arts Learning App Nov 2022 – Mar 2023

- Led a two-person team designing a music, dance and instrument learning app built around learning paths and motivation, from research and personas to a full visual design and prototype; put on hold by the client before launch.

Jeevika — Street Vendor Platform May 2022 – Oct 2022

- Led a two-person team designing a Hindi-first mobile app and NGO dashboard that help street vendors know their rights, call for help and track legal cases; now live and in use.
- Turned CCS's vendor interview data into personas, and designed an illustrated interface in everyday Delhi Hindi for low-literacy, first-time smartphone users.
- In a follow-on engagement, designed the admin panel for CCS and vendor associations: harassment heatmaps, complaint management with escalations, analytics and reports; now live.

Portico — HRMS Platform Redesign Oct 2021 – Apr 2022

- Led a team of 4 designers to redesign a legacy HRMS into a modern SaaS platform, reducing workflow steps for core administrative tasks by 30%.

Fintech Client — Mutual Fund Module Jun 2021 – Sep 2021

- Led a two-person team designing a mutual fund module inside a stock-trading app, for first-time and experienced investors.
- Ran stakeholder workshops, competitor benchmarking and job stories, and prioritised features with value–effort mapping.
- Took core flows (dashboard, fund detail, autopay mandate, order status) through two review rounds before the client paused external work.

UX Designer, White Digital Feb 2020 – Mar 2021

Mumbai, India

- Led the design team at a digital marketing agency, running market research and creating tailored UX solutions for clients.
- Designed responsive websites and web applications for organizations across multiple industries.

UX Designer, Infosys Nov 2018 – Dec 2019

Bengaluru, India

- Designed a machine-learning product that reduced dispatcher workload in IT service management.
- Led design of a gamification platform for internal idea-sharing.
- Built an internal client-management portal for gathering automation requirements across multiple clients.

System Engineer, Infosys Oct 2015 – Oct 2018

Bengaluru, India

- Designed custom network configurations for client environments covering connectivity, performance, and security, a technical foundation that now informs design on complex, security-critical systems.

EDUCATION

MS, Information Technology, University of Mumbai | 2019 – 2021

B.Sc., Computer Science, University of Mumbai | 2012 – 2015

CERTIFICATIONS

- Google UX Design Professional Certificate, Google (Coursera) | 2022
- UXPM Level 1 & 2, UX Alliance | 2021 – 2022
- Introduction to User Experience Principles & Processes, University of Michigan (Coursera) | 2019

ACADEMIC LEADERSHIP

Board of Studies Member, Royal Higher Education Society's College Jun 2024 – Present

Thane, India

- Contribute to curriculum development and academic direction for the college's design and technology programmes.
