Azhar Shaikh

Senior UX Designer | Automotive HMI, Healthcare, Fintech & SaaS

Portfolio: blackhellcan.github.io/portfolio | mazhar.shaikh91@outlook.in | +91 97692 11554 | linkedin.com/in/mazharshaikh91
Mumbai, India

PROFESSIONAL SUMMARY

Senior UX Designer with 8 years in UX and 11 in tech, specialising in interfaces people have to read under pressure: motorcycle clusters, emergency-care devices and apps for first-time smartphone users. Leads small design teams from research and information architecture to prototypes built alongside engineering, and builds AI tools that make design teams faster.

SELECTED IMPACT

- **Shipped on production vehicles:** led the menu and navigation architecture for Bajaj's 5" TFT clusters; chosen over a competing team's design and now on the Pulsar N160 SS.
- **Safety-critical healthcare:** designed Philips Tempus Pro emergency-care software and validated its flows in usability testing with paramedics.
- **Live products:** Mera Bajaj owner app on the App Store and Google Play for about two years; PockIT marketplace live with 1,000+ users.
- **Inclusive design:** Hindi-first app and admin panel for low-literacy street vendors, both live and in use.

EXPERIENCE

Senior UX Designer | PeepalDesign

Jun 2021 – Present

Mumbai, India (Remote)

Design consultancy. Led UX on fixed-scope client engagements in automotive, healthcare, fintech and SaaS, often two in parallel.

PeepalDesign — AI Tools, Company Website & New Business May 2026 – Present

- Built GapScan, an internal AI tool that audits a product or website and reports its UX gaps, plus a tool that reads a live website and extracts its design system; both used by the team on client work.
- Created Claude and ChatGPT skills and plugins for internal workflows, speeding up delivery and asset production, organising the design asset library, and drafting proposals and estimates.
- Designed AI apps for client companies, and redesigned PeepalDesign's company website.

Bajaj Auto — 5" TFT Instrument Cluster Case study ↗ Jan 2025 – Oct 2025

- Led a 4-member team designing the information architecture, menus and navigation for Bajaj's move from LCD to 5" TFT clusters; chosen over a competing design team's architecture and shipped first on the Pulsar N160 SS (2026).
- Designed for minimal cognitive load at speed, with inputs for tactile handlebar buttons that meet OEM vibration standards.
- Ran on-site workshops at Bajaj's engineering facility and built frame-by-frame Figma prototypes in parallel with Bajaj's developers to streamline handoff.

Philips — Emergency Care & Monitoring (Tempus Pro) Dec 2023 – May 2024

- Designed the next-generation Tempus Pro companion app for remote vitals monitoring in emergency settings.
- Modernized the device UI to meet homologation and accessibility standards, with a UI system shared across clinical devices.
- Ran usability testing with paramedics to validate safety-critical interaction flows.

Bajaj Auto — Mera Bajaj App & Chetak EV Display Case study ↗ Mar 2023 – Jun 2023

- Led the redesign of the Mera Bajaj owner app for Pulsar riders (pairing, trips, navigation, service booking), mentoring a junior designer; live on the App Store and Google Play for about two years.
- Designed the navigation and menu system for the Chetak EV's 5" display, now shipping on Chetak EV scooters.

PockIT — IT Repair & Refurbished Device Marketplace Case study ↗ Apr 2024 – Dec 2024

- Led design of a two-sided mobile platform with a junior designer: a customer app for booking IT repairs and buying refurbished devices (B2C and B2B), and a technician app for managing daily jobs; now live with 1,000+ users.
- Designed trust into every step for low-tech users: device-first booking in plain language, upfront pricing, in-app approval for new parts, and a happy code the customer shares to close each job.
- Scoped a lean first release with the client to compete against better-funded players, so operations could be set up before scaling the product.

Jeevika — Street Vendor Platform Case study ↗ May 2022 – Oct 2022

- Led design, with a junior designer, of a Hindi-first mobile app and NGO dashboard that help street vendors know their rights, call for help and track legal cases; now live and in use.
- Turned CCS's vendor interview data into personas, and designed an illustrated interface in everyday Delhi Hindi for first-time smartphone users with low literacy.
- In a follow-on engagement, designed the live admin panel for CCS and vendor associations: harassment heatmaps, complaint escalations, analytics and reports.

Portico — HRMS Platform Redesign Case study ↗ Oct 2021 – Apr 2022

- Led a team of 4 designers to redesign a legacy HRMS into a modern SaaS platform, reducing workflow steps for core administrative tasks by 30%.

Philips — Philips Displays Global Website Redesign Nov 2025 – May 2026

- Led the redesign of the global Philips Displays responsive website: restructured IA and navigation for product discoverability, and built a modular pattern library for regional sites.

Fintech Client — Mutual Fund Module Case study ↗ Jun 2021 – Sep 2021

- Led design of a mutual fund module in a stock-trading app, from stakeholder workshops to two reviewed rounds of core flows; paused when the client stopped external work.

Other engagements: Chetak EV owner app UI revamp, Bajaj Auto (Dec 2025 – Jan 2026); clinical management module UX, HealthAssyst (Jan – Mar 2024); performing-arts learning app, YoungArtiste (Nov 2022 – Mar 2023, on hold before launch).

UX Designer | White Digital Feb 2020 – Mar 2021
Mumbai, India

- Led the design team at a digital marketing agency, designing responsive websites and web apps for clients across industries.

UX Designer | Infosys Nov 2018 – Dec 2019
Bengaluru, India

- Designed a machine-learning product that reduced dispatcher workload in IT service management.
- Led design of a gamification platform for internal idea-sharing, and an internal portal for gathering clients' automation requirements.

System Engineer | Infosys Oct 2015 – Oct 2018
Bengaluru, India

- Configured client networks for connectivity, performance and security.

SKILLS

Product & UX Design: Interaction Design, Information Architecture, Web, iOS and Android Apps, HMI / Cluster Design
Visual & UI Design: Visual Design, UI Design, Style Guides, Moodboards, Wireframes, High-Fidelity Mockups, Prototyping
Design Systems: Component Libraries, Figma Tokens and Variables, Component Variants, Pattern Documentation
Research & Experimentation: User Research, Usability Testing, A/B Testing, Hypotheses and Success Metrics, UX Metrics, Personas, Journey Mapping, Discovery Workshops, Competitor Benchmarking
AI Tools: Claude, Claude Design, ChatGPT, Cursor, Figma Make, Figma AI, Google Stitch, Figma MCP, Skills and Plugins
AI Design Principles: Human-AI Interaction (Microsoft HAX, Google PAIR), Calibrated Trust, Explainability, Human Oversight
Accessibility & Compliance: Accessibility (WCAG), Inclusive Design, Medical Device and Homologation Standards
Leadership: Hiring and Mentoring Designers, Design Critique, Stakeholder Management, Agile / Scrum, Developer Handoff
Tools & Tech: Figma, FigJam, Axure RP, Balsamiq, Adobe XD, HTML5, CSS3, JavaScript, Python

EDUCATION

MS, Information Technology, University of Mumbai | 2019 – 2021
B.Sc., Computer Science, University of Mumbai | 2012 – 2015

CERTIFICATIONS

- Google UX Design Professional Certificate, Google (Coursera) | 2022
- UXPM Level 1 & 2, UX Alliance | 2021 – 2022 | Credential IDs UX-PM1-5004-IN21-0094, UX-PM2-3372-IN22-0091

ACADEMIC LEADERSHIP

Board of Studies Member | Royal Higher Education Society's College Jun 2024 – Present
Thane, India

- Contribute to curriculum development and academic direction for the college's design and technology programmes.
